PROFILE

Full-stack TypeScript engineer, 3 years of experience including a year and a half at Diggers Factory (on-demand vinyl production, international user base). I take ownership of complete products, from backend to mobile, and ship them to production fast.

SKILLS

Front : TypeScript, JavaScript, React, Next.js (App Router), Tailwind CSS

Back : Node.js, AdonisJS, Express, API REST, PostgreSQL, SQL, MongoDB

Mobile : Capacitor (iOS), StoreKit, APNs, RevenueCat

DevOps & tests : Docker, GitHub Actions (CI/CD), Git, Jest, Playwright

Product & data : Stripe, Firebase, PostHog, AppsFlyer, TikTok Pixel

AI : Claude Code, Cursor, OpenAI API (product integration)

EXPERIENCE

Software Engineer · Diggers Factory

Paris · 03/2025 – present

On-demand vinyl production: worldwide user base, collaborations with major artists.

- Built the artist onboarding flow (production tracking, product customization at sales launch), presented by leadership to **two major international record labels** (New York).
- Ownership of "La Box", a monthly vinyl subscription: US market adaptation, geolocated stock, gamification, Stripe payments (hardened renewals, vinyl add-ons), **+100 subscribers in the first month**.
- Built **critical modules of the production dashboard** (AdonisJS, PostgreSQL), used daily by production and distribution teams: automatic order dispatch based on users' music styles, automated goodie placement (seasonality, quantities, out-of-stock handling).
- Created an **artwork analysis algorithm** for artist uploads (DPI, CMYK): automated pre-print file checks, saving significant time for the design team.
- Cut technical debt by roughly **80% in 3 months**: dockerization, CI/CD with GitHub Actions, migration to the Next.js App Router, TypeScript adoption (full infrastructure typing) and Tailwind CSS.
- Led **cross-functional projects end to end** with sales, production and distribution teams, working directly with the CTO.
- **Official mentor of an apprentice developer**: day-to-day guidance and upskilling.
- Redesigned 18 services & marketing pages (GSAP animations, Three.js R3F).

Full-Stack Web Developer · Freelance

Paris · 02/2023 – present

- Delivered **9 SaaS projects** for the real-estate inspection industry (Diag Actu, Gestion Diag), ~2 months per project, in a team of 3 developers and 1 designer.
- Hosted technical webinars: trained 50+ industry professionals.
- 2024 engagement: immersive web platform for an artistic director (Next.js 14, React, MongoDB), large-scale image optimization, Awwwards-level standards.

PROJECTS

- **MyPhillowFriend** (React, AdonisJS, TypeScript, API OpenAI) : philosophical companion iOS app, live on the App Store, 400 sign-ups including 100 active users. RevenueCat monetization, PostHog analytics, TikTok Pixel acquisition, AI-based lesson scoring system.
- **Hellodash** (Next.js, React, NextAuth) : advanced CMS, customizable blogs, user and role management.

EDUCATION

Bachelor in Web & Multimedia, MyDigitalSchool (2022) · Web Development program, OpenClassrooms (2023) · French Baccalaureate, CS & Economics tracks (2020)

ADDITIONAL

Languages : French (native), English (fluent)
